MainSt HUB - On-boarding Retailers & Service Co's

MainSt HUB offering is quickly increasing the number of storefronts and service providers to ARknet with the ease of having their products and services featured at no cost. HUB participants will be eligible for local community engagement scavenger hunts, starting soon with up coming release of ARknet 1.9.22. Adding **SEARCH ENGINE SOLR** into the app now as most data structures used for organizing and showing product details in the ecommerce area of MainSt are stabilizing. This will bring the added performance search capabilities needed for the mobile app perform at the expected speed of business. More sections are being included with the SOLR search indexing beyond just MainSt.
