MainSt Shopping - New Hours Tracking Feature in ARKnet 2.0 Coming Next

Easily post hours for each day of the week. Activate only the days your store is open. MainSt business owners can also split hours on the same day allowing for most any open and close pattern. Hours will be displayed in natural language on the business storefront (iOS & Android ARKnet app and syndicated Web App). It will also be used as near-real-time (~5min) updates to the search engine. This type of complex data block will also later be included in voice controls on local business search, and any future ARKnet business intelligence AI.
