MainSt - What's Next

MainSt adding offering for service companies and will grant the ability to create quotes for free using the same components now used to add single product SKUs (items that have no variations), and configurable products. Businesses seeking to streamline their quoting process will enjoy the auto-calculations, and automatic PDF quote sent to the customer. Vendors can easily open a video call with the requester, or chat privately regarding the inquiry/quote request. Initially there will be no fees associated with quotes to allow for adoption, but this will be shifted to per quote fee, or small percentage of transaction amount. Additional payment methods may be included in the future to allow larger payments via the expanding number of Stripe payment methods.
